

Peabody Beardsley Maritime Chapter

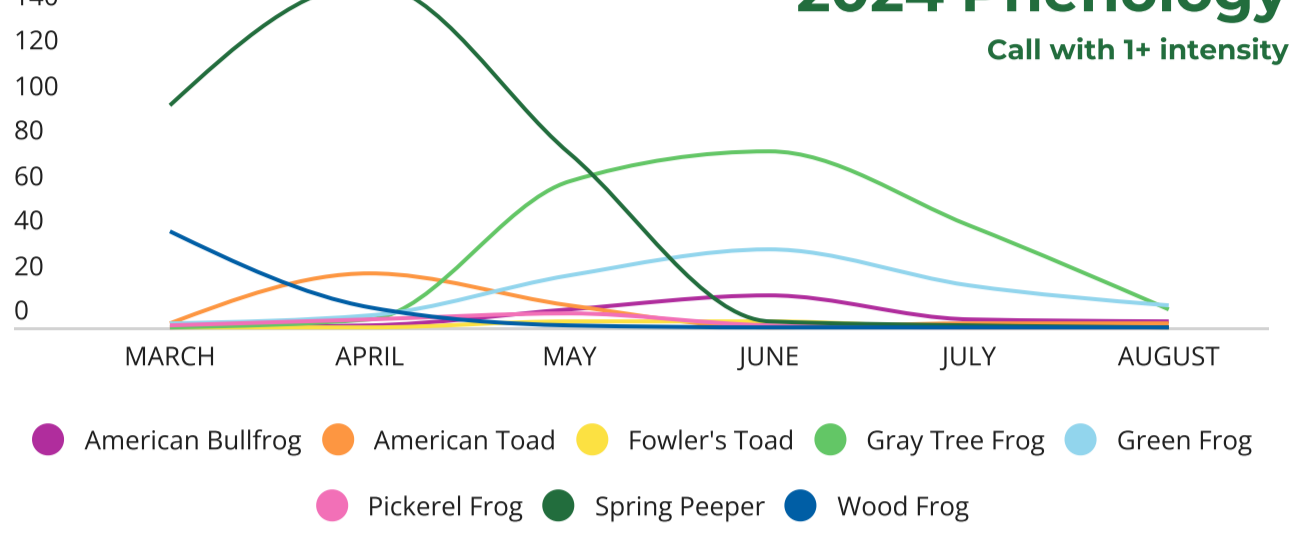

Thank you for another AMAZING season of FrogWatch with the Peabody-Beardsley-Maritime chapter of FrogWatch USA. This year has been full of interesting weather, observations, and events, and we cannot thank you enough for being there through it all to document how the frogs and toads have responded. We hope you all have enjoyed this season, and we look forward to seeing you in the spring for the next season.

With extreme gratitude,
Andrew, Bridget, Jen, and Jim

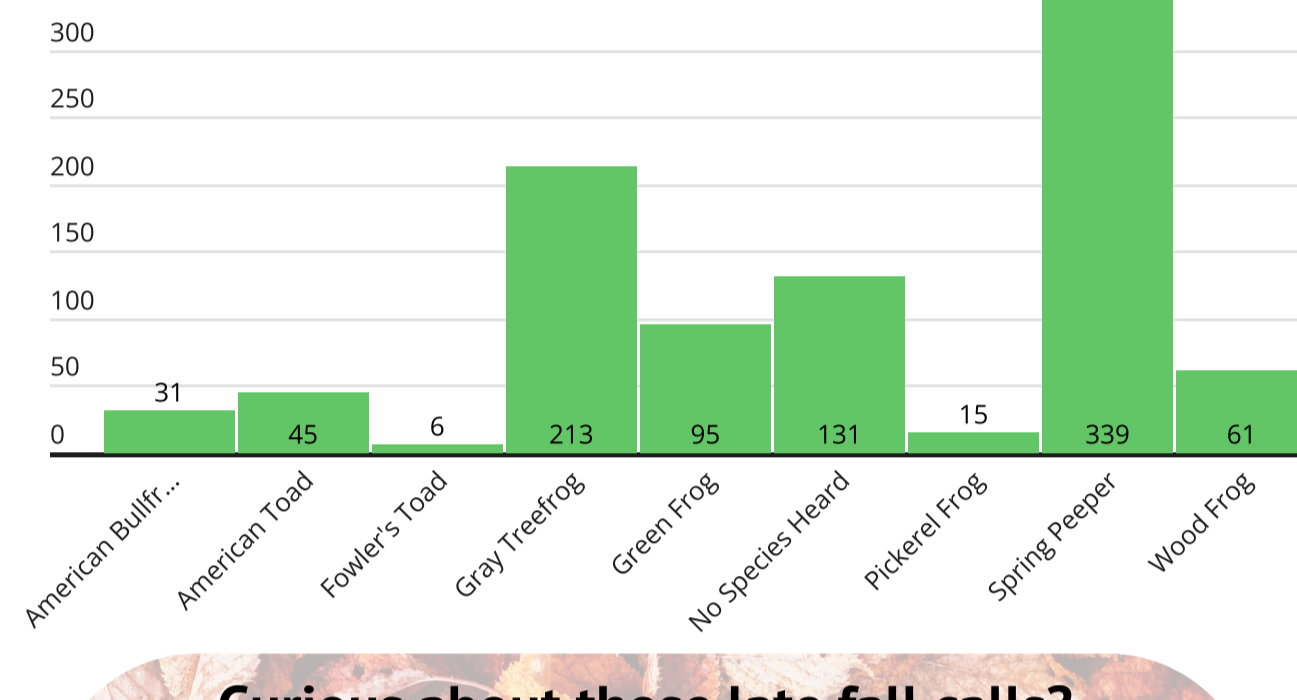

By the numbers

2024 Summary

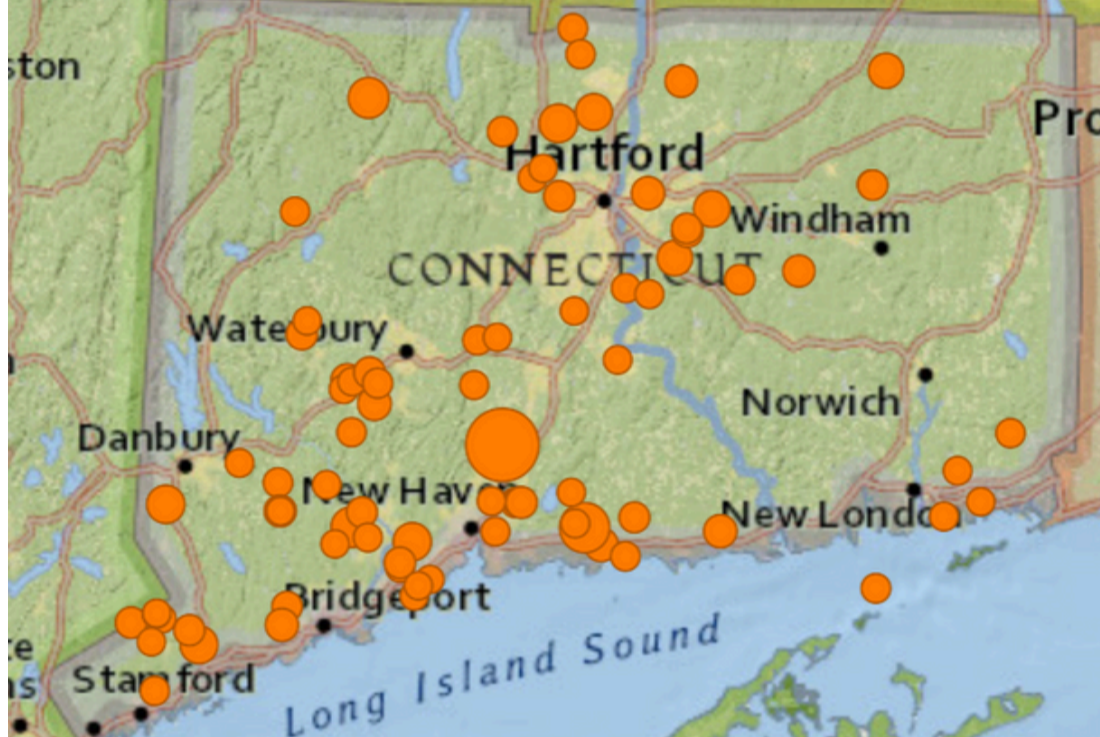

2024 Total Observations

Curious about those late fall calls?

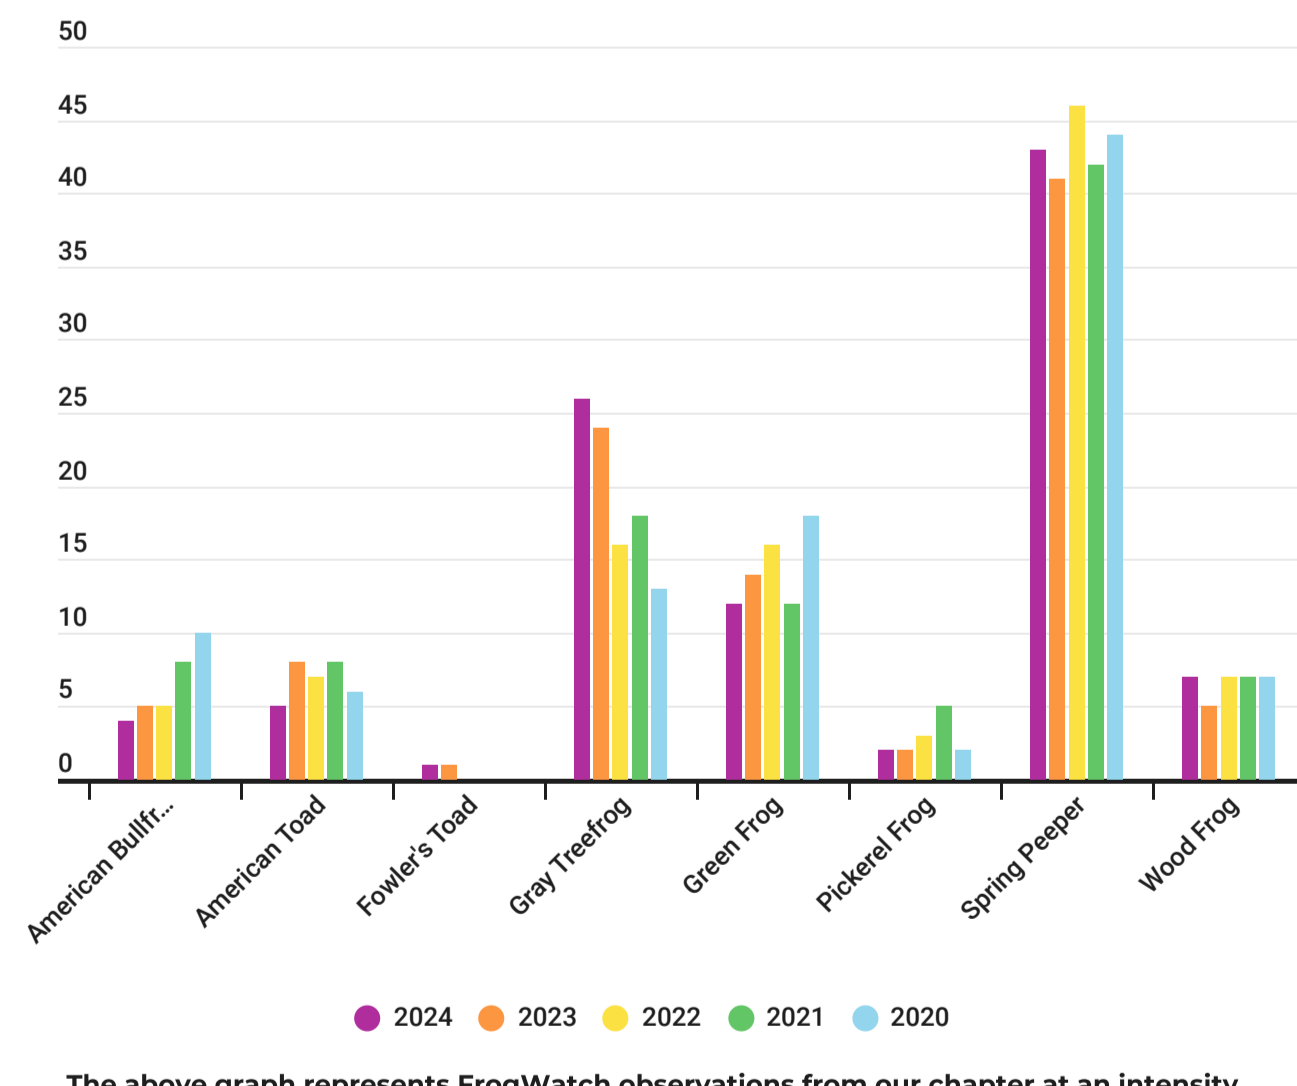

This post from Jim's *Beyond Your Backdoor* blog provides a little insight as to why we may hear some frog calls into the fall.

For Comparison

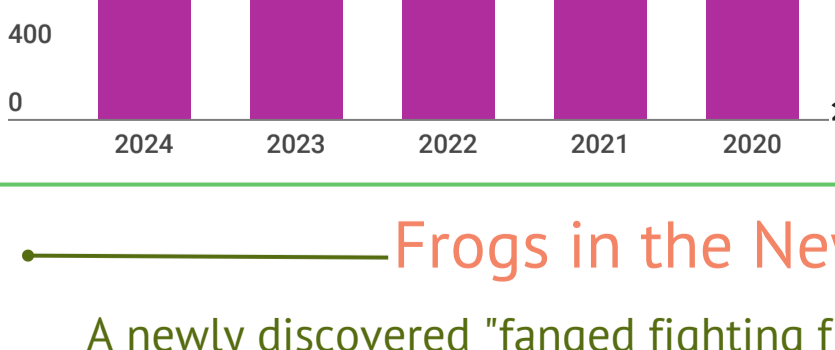

The above graph represents FrogWatch observations from our chapter at an intensity level of 1 or greater broken down by percentage of total calls heard per year.

A closer look at the American Bullfrog 5-year trend

We looked at total American Bullfrog observations reported to all of FrogWatch from 2020-2024 and we can see there seems to be a slight downward trend observed among all chapters in the U.S, reflective of what we have seen as well.

A closer look at the Gray Treefrog 5-year trend

We looked at total Gray Treefrog observations reported to all of FrogWatch from 2020-2024 and we can see there seems to be a slight upward trend observed among all chapters in the U.S from 2020-2023, similar to what we have seen as well.

Congratulations!

Each FrogWatcher averaged 12 observations for the season. Special shout out to Robert S. for making **140** observations in 2024!
